

KNAPHEIDE UTILITY VAN

Only the KUV[®] gives you interior space superior to a standard cargo van plus easily accessible outside storage compartments. Organize your tools and parts and still have space to carry cargo.

PRODUCTIVITY

Spend less time looking for things and more time doing the job. The Knapheide KUV[®] keeps your stuff where you need it.

SINCE 1848

Compare the KUV[®] with the standard cargo van...

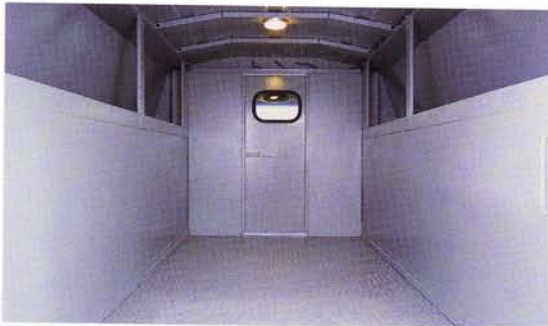

KUV[®]

- 8 outside access compartments for parts and tools, 64 cu. ft. of storage

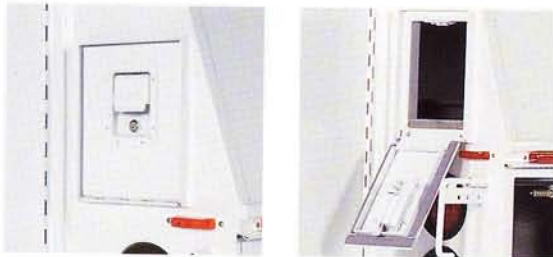

Cargo Van

- Must climb inside for everything

- Roomy interior measures 54" wide, 57" high and 10' long—more than enough space for 4x8 or 4x10 sheets of plywood, sheetrock or other materials. Plus two full length shelves in the upper canopy

- Floor space in commercial applications is very restrictive

- Rear access conduit chutes on each side allow for storage of pipe, conduit or other materials up to 10' in length in the body's upper canopy

- Must use external carriers

- Sliding bulkhead door provides access to the cargo area from the cab. When closed, the door seals the cab off for superior temperature control, reduced noise and improved safety from shifting cargo.

- Usually the driver is forced to heat or cool the entire cavity while experiencing a higher exposure to noise from rattling parts and tools

Construction Features

- K-Coat complete immersion primer coat for rust protection
- Stainless steel continuous hinge for strength and corrosion protection
- Paddle-activated rotary-style latches close easily and stay closed
- Exclusive adjustable Security Ring striker for strength, security and a weather tight seal
- Durable galvaneal steel body construction

Standard Equipment

- 11 adjustable divider shelves
- 2 cargo area dome lights both switched at the rear door.
- Door retainers hold doors at 90° opening.

- Master locking system
- Conduit chutes

The KUV[®] features everything you liked about your old cargo van...profile, maneuverability and narrow footprint... plus you now have a "workshop on wheels."

Ford ship-through delivery available throughout the United States, Alaska, and Hawaii.

- Security screens on rear doors (standard) or no glass at all (option).

Optional

- Galvagrip[™] rear bumper with step well eases loading and unloading

Options

- Ladder rack

- Etrack to secure cargo in the load space

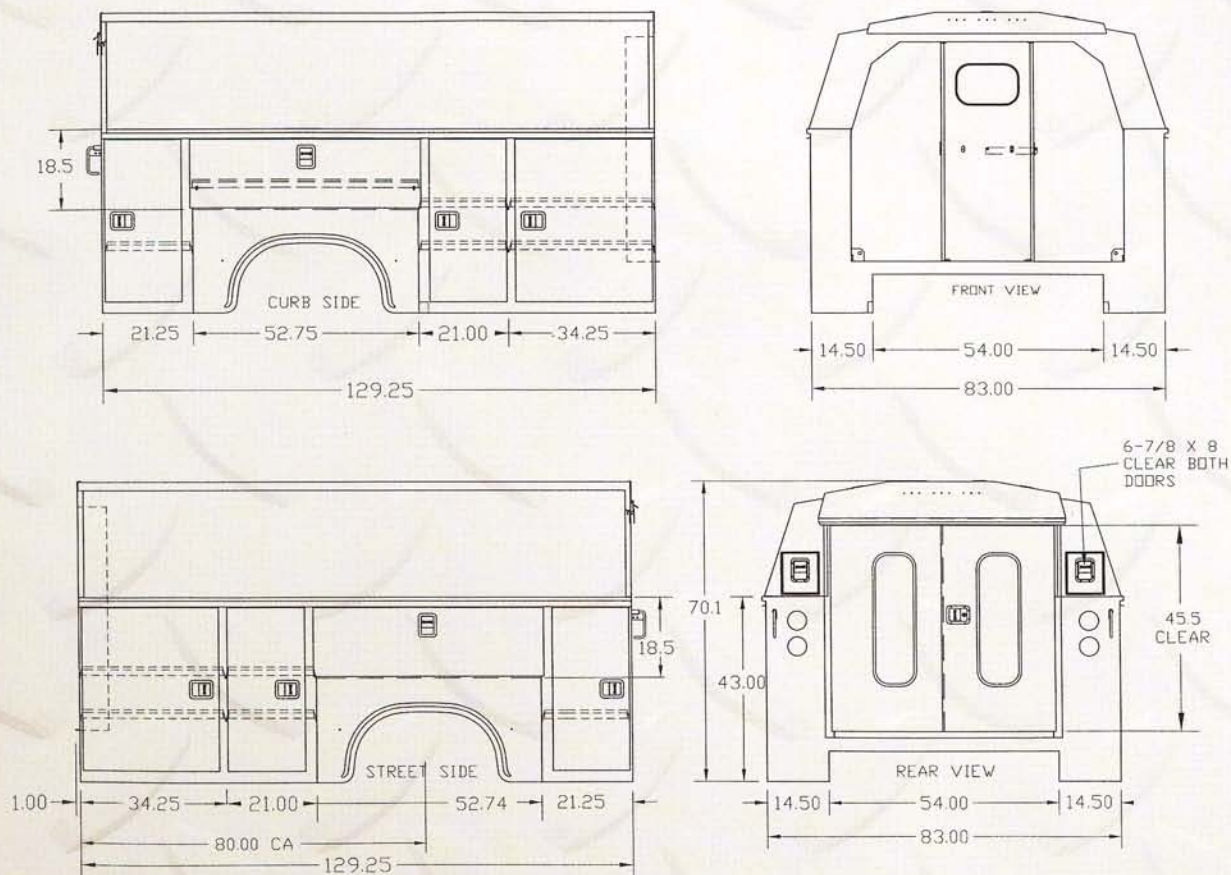

- Receiver hitch with electric plug

- Solid bulkhead instead of sliding door

- Stainless steel rotary paddle latch

Workshop on Wheels

Body Model - KUV129SUK
 GVWR - 9600#
 Body Weight - 2297# (with bumper)
 Payload* - 2502#
 FORD E350 Commercial Cutaway, 80" CA
 *Final payload calculations subject to chassis options.

Storage Capacity - 290 CU FT
 Interior - 226 CU FT
 Exterior - 64 CU FT

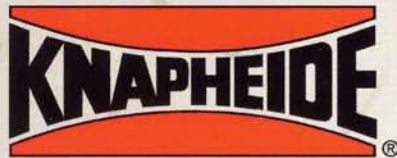

Why Knapheide? Because Rust Never Sleeps

When you buy quality Knapheide products, rust shouldn't be a worry. To provide the best protection against rust, we installed K-Coat, our state-of-the-art, custom-designed electrocoating prime paint system. K-Coat bonds paint to steel by an electroplating process, to give you better corrosion protection than spraying. Complete immersion in K-Coat results in a prime coat that provides excellent chemical and solvent resistance. Our K-Coat system is the best electrocoat prime paint system in the industry. Because rust never sleeps. And because you should never worry about the quality of your Knapheide product.

Quality you ask for by name
